Latest update: April 20, 2015 (DME)

NOTES:

- 1) (IR) – Inspection Reports
- 2) For IRs, Licensing verifies that CRs generated adequately recognize and address any violations/findings identified in the IR. If necessary, the responsible manager is contacted to resolve discrepancies (e.g. update CR, initiate a CRCA to address, initiate new CR). Also ensure a CA is created to perform a closure review per EN-LI-102.
- 3) For annual and semi-annual assessment letters, coordinate a SARB meeting to determine the pre-inspection assessments that will be performed and ensure CA&A issues the associated LOs (EN-LI-104).

SUBJECT: NON-PUBLIC SECURITY INSPECTION PLAN FOR THE ENTERGY NUCLEAR OPERATIONS, INC., VERMONT YANKEE NUCLEAR PLANT

Dear Mr. Wamser:

The enclosed inspection plan lists the security inspections scheduled through December 31, 2017. The inspection plan is provided to allow for the resolution of any scheduling conflicts and personnel availability issues well before our inspectors arrive on site.

While we are fully committed to our goal of ensuring openness in our regulatory process, we must balance that goal with the more immediate need of ensuring the continued safe and secure operation of nuclear facilities and the protection of nuclear materials in our country. Thus, due to the security-related information contained in this correspondence, and in accordance with the U.S. Nuclear Regulatory Commission (NRC) Policy for Handling, Marking, and Protecting Sensitive Unclassified Non-Safeguards Information, a copy of this letter and its enclosure will not be available for public inspection in either the NRC Public Document Room or the Publicly Available Records (PARS) component of NRC's Agencywide Documents Access Management System (ADAMS).

If circumstances arise which cause us to change the inspection plan, we will contact you to discuss the change as soon as possible. Please contact me at (610) 337-5150 with any questions you may have regarding the inspection plan.

Sincerely,
