

Procedure/Document Number: EPOP-SEC-3547

Revision: 01

Equipment/Facility/Other: Vermont Yankee

Title: Security Actions During an Emergency

Part I. Description of Activity Being Reviewed (event or action, or series of actions that may result in a change to the emergency plan or affect the implementation of the emergency plan):

Throughout

- Revised procedure references to match SAFSTOR
- Removed references to the Power Uprate Building (PUB)

Attachment 2

- Replaced title of Shift Manager with Certified Fuel Handler

Part II. Activity Previously Reviewed?

Is this activity fully bounded by an NRC approved 10 CFR 50.90 submittal or Alert and Notification System Design Report?

If YES, identify bounding source document number/approval reference and ensure the basis for concluding the source document fully bounds the proposed change is documented below:

Justification:

- Bounding document attached (optional)

YES
50.54(q)(3)
Evaluation
is NOT
required.
Enter
justification
below and
complete
Part VI.

NO
Continue to
next part

Part III. Applicability of Other Regulatory Change Control Processes

Check if any other regulatory change processes control the proposed activity.(Refer to EN-LI-100)

NOTE: For example, when a design change is the proposed activity, consequential actions may include changes to other documents which have a different change control process and are **NOT** to be included in this 50.54(q)(3) Screening.

APPLICABILITY CONCLUSION

- If there are no controlling change processes, continue the 50.54(q)(3) Screening.
- One or more controlling change processes are selected, however, some portion of the activity involves the emergency plan or affects the implementation of the emergency plan; continue the 50.54(q)(3) Screening for that portion of the activity. Identify the applicable controlling change processes below.
- One or more controlling change processes are selected and fully bounds all aspects of the activity. 50.54(q)(3)

Evaluation is NOT required. Identify controlling change processes below and complete Part VI.

CONTROLLING CHANGE PROCESSES

10CFR50.54(q)

Part IV. Editorial Change

Is this activity an editorial or typographical change such as formatting, paragraph numbering, spelling, or punctuation that does not change intent?

Justification:

YES
50.54(q)(3)
Evaluation
is NOT
required.
Enter
justification
and
complete

NO

	Part VI.	
--	----------	--

Part V. Emergency Planning Element/Function Screen (Associated 10 CFR 50.47(b) planning standard function identified in brackets) Does this activity affect any of the following, including program elements from NUREG-0654/FEMA REP-1 Section II?

1. Responsibility for emergency response is assigned. [1]	<input type="checkbox"/>
2. The response organization has the staff to respond and to augment staff on a continuing basis (24/7 staffing) in accordance with the emergency plan. [1]	<input type="checkbox"/>
3. The process ensures that on shift emergency response responsibilities are staffed and assigned. [2]	<input type="checkbox"/>
4. The process for timely augmentation of onshift staff is established and maintained. [2]	<input type="checkbox"/>
5. Arrangements for requesting and using off site assistance have been made. [3]	<input type="checkbox"/>
6. State and local staff can be accommodated at the EOF in accordance with the emergency plan. [3]	<input type="checkbox"/>
7. A standard scheme of emergency classification and action levels is in use. [4]	<input type="checkbox"/>
8. Procedures for notification of State and local governmental agencies are capable of alerting them of the declared emergency within 15 minutes after declaration of an emergency and providing follow-up notifications. [5]	<input type="checkbox"/>
9. Administrative and physical means have been established for alerting and providing prompt instructions to the public within the plume exposure pathway. [5]	<input type="checkbox"/>
10. The public ANS meets the design requirements of FEMA-REP-10, Guide for Evaluation of Alert and Notification Systems for Nuclear Power Plants, or complies with the licensee's FEMA-approved ANS design report and supporting FEMA approval letter. [5]	<input type="checkbox"/>
11. Systems are established for prompt communication among principal emergency response organizations. [6]	<input type="checkbox"/>
12. Systems are established for prompt communication to emergency response personnel. [6]	<input type="checkbox"/>
13. Emergency preparedness information is made available to the public on a periodic basis within the plume exposure pathway emergency planning zone (EPZ). [7]	<input type="checkbox"/>
14. Coordinated dissemination of public information during emergencies is established. [7]	<input type="checkbox"/>
15. Adequate facilities are maintained to support emergency response. [8]	<input type="checkbox"/>
16. Adequate equipment is maintained to support emergency response. [8]	<input type="checkbox"/>
17. Methods, systems, and equipment for assessment of radioactive releases are in use. [9]	<input type="checkbox"/>
18. A range of public PARs is available for implementation during emergencies. [10]	<input type="checkbox"/>
19. Evacuation time estimates for the population located in the plume exposure pathway EPZ are available to support the formulation of PARs and have been provided to State and local governmental authorities. [10]	<input type="checkbox"/>

Procedure/Document Number: EPOP-SEC-3547	Revision: 01

Title: Security Actions During an Emergency	

20. A range of protective actions is available for plant emergency workers during emergencies, including those for hostile action events.[10]	<input type="checkbox"/>
21. The resources for controlling radiological exposures for emergency workers are established. [11]	<input type="checkbox"/>
22. Arrangements are made for medical services for contaminated, injured individuals. [12]	<input type="checkbox"/>
23. Plans for recovery and reentry are developed. [13]	<input type="checkbox"/>
24. A drill and exercise program (including radiological, medical, health physics and other program areas) is established. [14]	<input type="checkbox"/>
25. Drills, exercises, and training evolutions that provide performance opportunities to develop, maintain, and demonstrate key skills are assessed via a formal critique process in order to identify weaknesses. [14]	<input type="checkbox"/>
26. Identified weaknesses are corrected. [14]	<input type="checkbox"/>
27. Training is provided to emergency responders. [15]	<input type="checkbox"/>
28. Responsibility for emergency plan development and review is established. [16]	<input type="checkbox"/>
29. Planners responsible for emergency plan development and maintenance are properly trained. [16]	<input type="checkbox"/>
APPLICABILITY CONCLUSION <input checked="" type="checkbox"/> If no Part V criteria are checked, a 50.54(q)(3) Evaluation is <u>NOT</u> required; document the basis for conclusion below and complete Part VI. <input type="checkbox"/> If any Part V criteria are checked, complete Part VI and perform a 50.54(q)(3) Evaluation.

Title: Security Actions During an Emergency	

BASIS FOR CONCLUSION

Throughout

- Procedure references were updated throughout to align with the SAFSTOR organization. This change is administrative in nature and does not alter the meaning or intent of this procedure, affect any facilities or equipment, or any other processes described in this procedure. No further action is required.
- This procedure has been revised to remove all references to the Power Uprate Building (PUB). The PUB was used as an office building prior to SAFSTOR and has been removed from the site. Sections of this procedure describe how the Security Shift Supervisor will make announcements to on-site personnel in the PUB by dialing into an intercom system. The removal of the PUB will not change the intent of this procedure because the purpose of calling the building was to notify the individuals of events occurring on the site. All employees from the PUB have been moved to the Plant Support Building (PSB). The PSB continues to be listed in this procedure and will continue to get the announcements during an emergency. This change does not alter the meaning or intent of this procedure, affect any facilities or equipment, or any other processes described in this procedure. No further action is required.

Attachment 2, Security Coordinator Responsibilities

- The note in this section has been updated to replace the title of Shift Manager with Certified Fuel Handler. The US Nuclear Regulatory Commission (NRC) issued an exemption in NRY 15-015 to remove the requirement that a licensed senior operator approve the emergency suspension of security measures and for Vermont Yankee Nuclear Power Station (VY) during certain emergency conditions or during severe weather under 10CFR50.54(x). As a result of this exemption, all suspensions must be approved by a Certified Fuel Handler. This change does not alter the meaning or intent of this procedure, affect any facilities or equipment, or any other processes described in this procedure. No further action is required.

The changes in this revision of EPOP-SEC-3547 do not affect any of the emergency planning elements or program functions listed in part V of this form. This revision does not require a change to the Emergency Plan or represent a reduction in effectiveness to the Emergency Plan. This change can be incorporated without prior NRC approval. No further action is required.
