SUBJECT: VERMONT YANKEE NUCLEAR POWER STATION - ISSUANCE OF
AMENDMENT TO CHANGE THE PHYSICAL SECURITY PLAN TO REFLECT
AN ISFSI-ONLY CONFIGURATION

Dear Mr. Daniels:

The U.S. Nuclear Regulatory Commission (NRC) has issued the enclosed Amendment No. 269 to Renewed Facility Operating License No. DPR-28 for the Vermont Yankee Nuclear Power Station (VY). The amendment is issued in response to your application dated March 29, 2017, as supplemented by letters dated June 28, 2017, September 14, 2017, and January 18, 2018 (Agencywide Documents Access and Management System (ADAMS) Accession Nos. ML17172A460, ML17181A186, ML17261A210, and ML18022A300, respectively). The enclosures to these letters may not be publicly available in ADAMS as they contain security-related and safeguards information. The amendment consists of changes to the VY Physical Security Plan (PSP) made to reflect an Independent Spent Fuel Storage Installation (ISFSI)-only configuration.

The proposed changes to the VY PSP reflect the status of a nuclear power reactor that has submitted its certifications under Title 10 of the *Code of Federal Regulations* (10 CFR), Section 50.82(a) for permanent cessation of power operations and permanent removal of fuel from the reactor vessel, and has completed the transfer of all irradiated fuel to the on-site Independent Spent Fuel Storage Installation (ISFSI). The implementation of the proposed changes is predicated upon the completion of the transfer of all irradiated fuel to dry storage in casks within the ISFSI. The movement of all irradiated fuel to the ISFSI will occur entirely within the existing Protected Area (PA), which includes the locations of the existing ISFSI pads. Implementation of the proposed changes also requires the installation or modification of those security structures, systems, and components necessary to support the ISFSI PSP. Additionally, the implementation of the proposed changes requires appropriate security measures to be in place during the transition from the current PSP to the ISFSI-only PSP.

The NRC staff determined that the proposed VY ISFSI-only PSP continues to meet the requirements in 10 CFR 72.212(b)(9). As such, the VY ISFSI-only PSP provides reasonable assurance that adequate protective measures can and will be taken in the occurrence of a physical security contingency at the site.

The amendments approving the VY ISFSI-only PSP are provided in Enclosure 1 to this letter. Enclosure 2 contains the staff's associated safety evaluation which includes safeguards information and should be protected from public disclosure. The Notice of Issuance will be included in the Commission's next biweekly *Federal Register* notice.
